

*"Assisting Each Person Served In Achieving The Highest Quality Of Life!"*

## 2022 TRENDS

### INTRODUCTION:

MRSI utilizes multiple sources of data in ensuring the reliability, validity, completeness and accuracy of outcomes. Sources include standard financial operating procedures, reviews and actions taken through various committees such as Accessibility, Safety, Human Resources and Strategic Planning. Additionally, policies and procedures addressing risk management, health and safety, technology, field trends and service delivery are reviewed at least annually and adjusted as appropriate.

Mountain Regional Services, Inc.'s enhanced data collection and participant input employs the National Core Indicators Survey questions as a template. Having established NCI as the structural base for measuring performance, satisfaction and trends evaluation, MRSI continues to incorporate the same process, thus addressing the needs of persons served, stakeholders and business needs of the organization and allowing for comparative analysis. MRSI summarizes characteristics of persons served, service delivery and business function performance through various methods, including the Organizational Performance Measurement and Management Outcomes Report, Trends Report and Annual Report.

MRSI utilizes THERAP documentation for identifying demographic trends, evaluating behavioral incidents, community integration and objective success. Adjustments continue to be made to THERAP modules and staff training is ongoing to meet accuracy, reliability and consistency expectations. THERAP is the primary source of data collection.

### SPECIAL NOTE:

Wyoming did not participate in the 2020-2021 In-Person Survey data collection period. Therefore, the trends data only reflects the National NCI information.

### DEMOGRAPHICS:

During the 2022 calendar year, MRSI provided habilitation services funded through the Home and Community-Based Services Waiver (HCBS) to 33 participants. Approximately 47 employees delivered services in Evanston.

Review of demographic information obtained through current Inventory of Client and Agency Planning (ICAP) reports show that a slight majority of persons served were males (58%). Ages of participants ranged between 21 and 84, with an average age of 49. Racial and ethnic backgrounds and cultures were supported for Native American (6%), Hispanic (6), and African American (6%) participants. Most participants (94%) were assisted by a guardian with 65% of the guardians being family members. All participants were unmarried.

Refer to Tables 1-6

#### **DIAGNOSIS:**

The majority of persons served met admissions eligibility related to an ID/DD diagnosis (97%). MRSI accommodated individuals diagnosed at all levels of ID/DD with 54% of participants in the mild range, 31% moderate, 9% profound, and 6% were reported as unspecified. Additionally, MRSI provided services to seven people with an autism spectrum diagnosis. Some participants (21%) faced additional hurdles as they were affected with a seizure disorder. All persons served in 2022 (100%) had a co-occurring psychiatric, mood, anxiety, psychotic or other mental illness. Behavioral challenges were experienced by 55% of MRSI participants with 14 having support through a behavior plan.

Refer to Tables 7-11

#### **HEALTH AND MEDICATIONS**

Comparable to national trends, MRSI participants received regular medical care. Results of the 2022 file review indicated that all participants had a primary care physician and 88% had completed a physical in the last year. Several participants left the program prior to their annual physical being completed. Health concerns identified included symptoms of cognitive decline such as Alzheimer's disease/dementia (6%), high cholesterol (30%), high blood pressure (42%) and diabetes (12%). A significant concern noted from health monitoring is the high rate of individuals overweight (36% overweight, 33% obese). Use of tobacco products is higher at MRSI (30%) compared to the national use of 6%.

Refer to Tables 12-16

As mentioned in the diagnostic section above, dual diagnosis and behavioral challenges were experienced by all of MRSI participants, with 97% taking at least one medication for mood, anxiety, psychotic disorders with 55% taking at least one medication for behavioral challenges.

Refer to Tables 18-20

#### **RIGHTS/ADVOCACY AND CHOICE:**

MRSI remains dedicated to ensuring that the rights and choices of persons served are respected and practiced. During the 2022 calendar year, MRSI continued efforts of educating persons served and staff

regarding rights and choice based on best practices and the Home and Community-Based Setting Transition requirements developed to meet the Centers for Medicare and Medicaid ruling. MRSI achieved full compliance with the CMS ruling in October 2018.

MRSI evaluated and modified training practices with the goal of increasing the understanding of advocacy, choice and rights. MRSI asked participants to share their views/perceptions and understanding of their ability to practice advocacy, choice and rights. Of the people who responded in 2022, 94% felt that they had attended or were offered the opportunity to participate in self-advocacy events compared to 2021 with 63%. One-hundred percent of respondents felt they had the opportunity to vote in the last election compared to 2021 with 75%.

Refer Tables 21 and 22

Understanding of the option to request or change case managers (83%) decreased slightly from 2021 but remains higher than the 2017 baseline year of 68%. When asked about having input in choosing staff, MRSI respondents (63%) expressed the understanding that they could which is a dramatic increase from 2021 at 18%.

Respondents understood they had accessibility to phones and internet (89%) and did not have restrictions in using them. Understanding of rights/choice in regards to money (100%), how they spend their free time (100%), and planning daily schedules (89%) remain higher than the national trends.

MRSI added a component to the 2018 data collection to include rights and choice perceptions of the staff working with participants. The same questions asked of participants were asked of staff. Staff (92%) understood that participants could request a change of case managers compared to 83% of the participants. Seventy-nine percent of staff felt participants had choice or input in staff assigned a dramatic increase from 39% in 2021. Staff also indicated understanding rights to phone, internet, money and developing schedules. This remains an area of education and training that participants and staff would benefit by addressing.

During 2022, participants worked on 124 objectives with a 68% completion or maintenance rate. Review of choice in regard to success/maintenance of goals that the participants expressed a desire to master showed a decrease in improvement from 84% in 2021 to 68% in 2022, which may be attributable to the on-going Covid-19 pandemic (quarantine), severe weather conditions and extended home visits and medical admissions.

Tables 23-29

## **COMMUNITY EMPLOYMENT:**

Of the 33 people served by MRSI through the Waiver, 36% (12 participants) held competitive jobs in the community. The average length of employment for participants was 85 months compared to the average of 89 months in 2021. People worked an average of 7 hours bi-weekly with a medium wage of \$8.78. The number of hours worked decreased significantly most likely due to the on-going Covid-19

pandemic and aging client population (retirement, medical issues). The average hourly wage is lower than the national trend (\$9.78). It is notable that the availability of benefits received by MRSI participants (8%) was significantly lower than the national (32%) trend. The majority of jobs were in retail, janitorial environments and other (shredding). Seventy-eight percent of participants working indicated that they had a choice in working and in the chosen job.

Tables 30-36

### **COMMUNITY INTEGRATION:**

During 2022, 97% of waiver supported recipients were enrolled in day or Community Integration Services with 89% indicating that they had choice and input in determining his/her day services. This perception of choice increased slightly from 84% in 2021. Fifty-six percent responded that they would like an increase in the amount of time they spent in CI services while 44% said they would like less time. MRSI participants felt that they were able to go out and do the things they liked to do (88%) with 94% stating they did get to go as often as they wanted. One-hundred percent indicated they had a way to get to places they needed to go. MRSI documentation shows that on average, persons served experienced 339 trips into the community during 2022. During 2022, staff received multiple trainings regarding complete and accurate documentation which may be a factor in the dramatic increase from 208 visits in 2021.

Again, MRSI staff was asked the same questions with regard to day services. Staff (98%) thought that participants had a choice in his/her day program and 97% felt that participants were able to do the things they liked doing in the community. Staff (58%) reported participants are able to go out into the community as often as they wanted, and had a means of getting places they needed to go (100%).

In addition to the perceptions of activities and outing; MRSI was interested in whether participants felt satisfied and supported with his/her social lives. Both participants (100%) and staff (100%) respondents indicated participants had friends other than staff or family. Participants felt they could see their friends or family when they wanted (100%) followed by 85% of staff. Staff (100%) responded positively at a higher rate than participants (76%) when asked if the participants had a way of communicating with family and friends when they could not see them. Over half (60%) of participant respondents indicated feeling lonely with 65% indicating they would like more help in making and keeping contact with friends.

Tables 37-48

### **COMMUNITY HOUSING/SUPPORTED LIVING:**

MRSI provided Community Housing Services (including Supported Living) to 33 people in 2022. The majority of participants (97%) lived in MRSI owned or operated homes with one participant living in his own apartment.

Seventy-two percent of participant respondents and 90% of staff felt choice was provided in where the

participant lived. When asked about choice in roommates, 29% of participants and 66% of staff felt they had input in choosing roommates. The positive response to this question increased for both participants and staff compared to 2021.

Most participants, 94% indicated they liked their home and 93% felt staff was respectful. When questioned regarding respect, staff responded more positively, with 97% feeling that staff was respectful to participants. All participants, (100%) stated they had keys to their bedrooms and 95% reported holding keys for the community living site. Respondents expressed that individuals knocked before coming in the home (82%) or bedrooms (94%). Eighty-five percent did respond that there were rules to having friends in their home. Participants expressed they had a place to be alone with friends and family (82%).

Participant responses indicated they felt they had enough things they liked to do at home (88%), and they had a way to get places when they wanted to go somewhere (100%).

Tables 49-62

### **BEHAVIORAL TRENDS:**

MRSI remains dedicated to assisting participants manage crisis situations through non-restrictive and non-physical interventions. Data collection and trends indicate significant progress towards this goal, as well as increases in participant self-management continuing to improve.

For example, in 2014, MRSI staff documented 10,931 incidents in regards to targeted behavioral concerns. In 2022, staff documented 1,339 targeted behavior reports resulting in an 88% decrease from the 2014 baseline year and a 9% decrease from 2021. In years past, nearly every participant also had a behavior plan in place compared to the previously mentioned 14 who have those supports in 2022.

MRSI files critical incident reports with the Home and Community-Based Services Section as well as other stakeholders as required. In 2022, data provided by HCBS Section and compared to MRSI documentation indicated that MRSI filed 192 critical reports compared to 190 in 2021 and 159 in 2020. Of the 192 critical incident reports, 72 were related to medication errors and 56 for police involvement. Sixty-one reports were documented in regards to medical admissions.

During 2022 MRSI had zero rights restrictions compared to 15 (possessions) in 2020 and a significant decrease from the 2014 baseline year (322) or 100%. The number of physical interventions utilized also decreased from 453 in 2014 to 2 in 2021.

Tables 63-66

### **SATISFACTION:**

MRSI modified satisfaction input in 2018 with a goal of collecting more meaningful data. While continuing to utilize the previous five rating Likert Scale for satisfaction, MRSI also incorporated

questions from the NCI survey to ascertain satisfaction and identify possible areas for growth and service improvements. Surveys were provided to participants throughout the year with guardians participating in an annual survey.

Respondents were asked to rate service areas they participated in on a 1-5 scale, with five indicating very satisfied. The Community Integration/Adult Day Services had an overall score of 4.58, Community Housing Services with a 4.56, Community Employment with a 4.94, and Supported Living with a perfect satisfaction rating of 5. Satisfaction increased in COI/ADS, CHS and CES; and remained the same for SL compared to the 2021 outcomes.

Questions regarding choice and input of participants were rated at high levels also, at 94% for Community Integration and 84% relating to choice for Community Housing Services. Community Employment services received a rating of 100% in all categories.

MRSI was concerned with perceptions of participants and guardians as to whether they felt services enhanced the participants' lives and again, the response was overwhelmingly yes, with a positive response of 89% for Community Integration/Adult Day Services, 91% Community Housing Services (including Supported Living) and 100% Community Employment.

Tables 67-72

#### **PLAN OF ACTION:**

The 2022 trend information is provided to management and made available to participants, guardians, support staff and stakeholders via the MRSI website or hard copy if requested. It is used in the ongoing review and adjustments to the MRSI Strategic Plan, Accessibility Plan as well as Performance Measurement and Management Plans. Actions proposed from this report will be indicated in the above mentioned plans as appropriate.
